Donatum huius adnotationis auctorem esse recte negavit Dziatzko; ad vetustiorum igitur commentatorem referatur necesse est. Atque iam alibi deprehendimus eum, qui Terentium cum Graecis comparavit et interdum critici partes sustinuit, cf. adn. ad Hec. I 1, 1⁶ et III 4, 26³; eidem quin hoc scholium tribuamus, nihil impedit. Quamquam intellegi non potest, quomodo is qui Apollodori fabulam vel fabulas ante oculos habebat in tantum errore incidit, siquidem quae viri docti de hoc loco iudicaverunt recte disputata sunt. Ceterum pugnant quae hic leguntur cum eis, quae praefationis I 1 auctor scripsit ipse ni fallor didascalica nisis.
- Phorm. prol. 26^{1 et 2}: cf. Don. Phorm. praef. I 1; I 2, 72²; schol. Bemb. Phorm. prol. 26. — v. Sabbadini, 'Studi ital.' II 22; Nencini l. c. 107 et 112 adn. 2; Dziatzko-Hauler, Phormio p. 78. — Apparet eum, qui Apollodori comoediam cum Terentiana contulit — quem Asprum fuisse suspicor — Phormionis nomen ab eo quod est *φόρμιον* derivasse, deinde alium commentatorem (fort. Donatum) originationem Latinae aliunde sibi cognitae addidisse ita, ut illum reiceret. Ex hoc scholio alterum fluxit, quod ad eundem versum legitur adscriptum, neque minus ex eo pendet auctor praefationis I 1 (ubi idem reprehenditur error qui scholio 26¹) et qui scholium ad I 2, 72² scripsit et cum illo praefationis loco et cum schol. 26¹ artissime coniunctum. Illud quoque non neglegendum videtur, quod duplex vocis *φόρμιον* sensus respicitur: etenim illud 'tegiculum a quo insternitur pauimentum' aliquo modo comparari potest cum verbis praefationis 'stramen nauticum', deinde 'fiscus sparteus' respondet τῶ 'phormione sparteo, quem nos errore dicimus'. Huc accedit, quod schol. 26¹ a uilitate parasito nomen inditum esse contenditur, scholio I 2, 72² a capacitate, quamquam hoc non expressis verbis dicitur; in praefatione autem legimus 'uel a capacitate uel uilitate' parasitum nomen accepisse. Quibus omnibus adducor, ut eundem scholiastam putem et scholium 26¹ additamento auxisse et schol. I 2, 72² scripsisse et praefationem composuisse: qui quin Donatus ipse fuerit, vix potest dubitari.

Is tantum ad ἀμφιβολίαν evitandam a Terentio additum putat τὸ 'meo', quod ut comprobet, affert Naevii versum initio mutilatum. Iam si considerabimus schol. 24³ ex scholio 24¹ esse excerptum, non audacior videbitur coniectura, in ipso Donati commento exstitisse additamentum illud ad Aspri adnotationem factum, vel, ut apertius dicam, Donatum ipsum verba 'sed mihi videtur — homo est' adiecisse (cf. - Phorm. I 2, 60²: quod in cod. V (= dett.) legitur 'ἀποσιώπησις (tertia)', hoc quidem quadrat ad ea, quae ad Andr. V 4, 51 de tribus ἀποσιώπησεως generibus exposita sunt, sed aperte pugnat cum sequentibus 'quotiens — sunt'; quae verba Hahn 1872, 8 perperam interpretatus est, nam hoc unum significant, loquentem uerba rebus apte respondentia invenire non potuisse.

Fuit igitur qui sic Terenti uerba intellexeret: 'GE. ... Est parasitus quidam Phormio, Homo confidens, qui — illum di omnes perduint! DA. Quid is fecit? GE. — hoc consilium, quod dicam, dedit.' Si igitur Geta narrationem illa exclamazione interrupit, pergit per 'hoc consilium' etc. (cf. schol. 74¹ et 74²), ut 'qui' sit pronomen (relativum); sin 'qui' (= utinam) cum sequentibus iungitur (sicut ad Phorm. II 2, 11), expletivum est. Lucili autem versus ideo affertur, ut interpretatio 'qui = utinam' exemplo comprobetur. Fortasse qui schol. 73³ ex integro commento excerpserit, ultima Lucili verba adiecta compendii nota recidit; deinde nescio quis alius adnotationibus, quae ad v. 74 leguntur, commotus ea addidit, quae inclinatis litteris exprimenda curavi; tum librarius rem male intellegens τὸ 'pergit' antecedentibus iunxit et pro 'et cetera' suo Marte substituit 'ad cetera'.
